

Sai Sujan S

Frontend-Focused Full Stack Developer

Bengaluru, India | saisujan.s03@gmail.com | github.com/sujan2332 | LinkedIn: [ADD YOUR LINKEDIN URL] | Phone: [ADD YOUR PHONE NUMBER]

SUMMARY

Frontend-focused Full Stack Developer with 1.5+ years of experience building enterprise-grade, scalable e-commerce web applications using React.js, Next.js, and Node.js. Delivered 800+ user stories and resolved 300+ production issues at AIEnterprise Inc., earning a Spot Award ranked #1 among 8+ senior developers and a promotion to a billable role. Independently designed, built, and shipped a 60+ page Astro marketing platform with real technical SEO, earning direct client trust and a second engagement.

EXPERIENCE

Frontend Software Engineer — AIEnterprise Inc.

Feb 2025 – Present | Bengaluru, India

- Owned the Account module (14 pages) end-to-end and led the Checkout module for BrandsMart USA, engineering a dynamic multi-step checkout flow with full back-and-edit navigation, order confirmation, and cart save-for-later/summary sections.
- Partnered directly with design, QA, and API teams; improved site accessibility; shipped a dynamic support-call UI based on business hours.
- Contributed to code architecture — API response aggregation, reusable CSS variables, and a custom internal npm library shared across the Account, Checkout, Browse, and Shop modules.
- Delivered 800+ user stories and resolved ~300 production defects while ensuring full cross-browser support.
- Awarded a Spot Award, ranked #1 among 8+ senior developers; one of 3 developers promoted to a billing role; assigned 2 additional projects directly by the CFO based on ownership and delivery track record.
- Independently designed, built, and shipped FogLifter, a 60+ page marketing platform on Astro — owning architecture through deployment, including technical SEO (JSON-LD schema, sitemap.xml, robots.txt, full OG/Twitter metadata), an interactive ROI calculator, and Core Web Vitals/SEO audits. Client trust in the delivery led to a second engagement rebuilding the parent company's (VSO Inc.) corporate website, currently ongoing as sole developer.
- Earlier, designed and built homepage banners, product cards, PDP UI, and hover-based image magnification for Allen Brothers — the first fresher in the company assigned to a live client project.

PROJECTS

Real-Time Chat Application — MERN Stack, Socket.io, JWT

Production-grade real-time messaging app with WebSocket-powered instant messaging, room-based communication, online presence indicators, and message history persistence.

Sare E-Commerce Platform — MERN Stack

Complete end-to-end e-commerce platform with a dynamic product catalog, advanced filtering, checkout flow, cart/wishlist management, and a reusable component library.

Fresh Cart — MERN Stack, Jest — Training Project

Full-stack MERN e-commerce application built solo in 6 weeks with Jest test coverage; ranked #1 among 4 fresher UI developers and earned direct assignment to a real-world enterprise client project.
