PROFESSIONAL SUMMARY

Frontend-focused Software Engineer with 1.5 years of experience building scalable, high-performance web applications and production-grade e-commerce platforms. Strong expertise in React.js, Next.js, and TypeScript, with hands-on experience developing complex e-commerce modules including Product Detail Pages (PDP), Product Listing Pages (PLP), checkout flows, and account management. Experienced in backend development with Node.js, Express.js, and MongoDB, enabling effective collaboration across the full stack. Independently built and managed SEO-optimized static websites using Astro, taking full ownership from development through deployment. Proven ability to own features end-to-end and collaborate with cross-functional teams and stakeholders — reflected in a Spot Award and early promotion within the first year.

TECHNICAL SKILLS

- **Frontend:** React.js, Next.js, Astro, HTML5, CSS3, Bootstrap, Tailwind CSS
- **Languages:** JavaScript (ES6+), TypeScript
- **Backend:** Node.js, Express.js, REST APIs
- **Database:** MongoDB
- **Tools:** Git, GitHub, npm, Vite, Postman, Render
- **Other:** Responsive Web Design, SEO, Web Accessibility (WCAG), Core Web Vitals, Performance Optimization, Agile Development

PROFESSIONAL EXPERIENCE

Software Engineer — AIEnterprise Inc.

Feb 2025 – Present

Delivered the following client engagements as a core member of the frontend team:

Project — VSO (Astro, Ongoing)

Independent Product Ownership | Jul 2026 – Present

- Independently driving development of a ground-up website rebuild for a compliance-focused enterprise client, covering frontend architecture, performance optimization, SEO, accessibility, and deployment readiness through direct client collaboration.

Project — FogLifter (Astro, WordPress, JavaScript)

Digital Platform Rebuild | May 2026 – Jul 2026

- Led the development of a new 59-page corporate website, re-engineering the platform from WordPress to Astro with a scalable component architecture and SEO-first foundation.
- Achieved 90+ Lighthouse scores across all 59 pages by engineering a high-performance frontend — optimizing rendering, asset delivery, accessibility, structured data, and redirects.
- Partnered directly with clients and leadership to translate business requirements into scalable solutions, earning a follow-up engagement for the parent company's website.

Project — BrandsMart USA (React.js, Next.js, REST APIs)

Enterprise E-commerce Platform | May 2025 – Apr 2026

- Owned the Account module (12+ pages) end-to-end, delivering pixel-perfect, responsive interfaces from Figma designs through REST API integration.
- Spearheaded Authentication and the Product Detail Page, and delivered 60% of Checkout — including multi-step checkout flows, quick checkout, reusable templates, and anonymous wishlist capabilities.
- Delivered 800+ user stories and resolved 300+ defects across enterprise e-commerce modules, ensuring reliable releases and production stability.
- Architected a reusable component library and shared frontend systems, improving scalability, accessibility, API efficiency, and Core Web Vitals across multiple modules.
- Earned a Spot Award and early promotion to a billing role for exceptional ownership, delivery velocity, and technical impact.

Project — Allen Brothers (React.js, REST APIs)

Production E-commerce Foundation | Feb 2025 – May 2025

- Delivered core e-commerce experiences — including PDP, Quick View, Category Listing, custom image zoom, and API-driven product workflows — contributing to a production-ready storefront foundation within an Agile team.

PERSONAL PROJECTS

- **Chat-Sphere** — Building a real-time chat application (MERN stack, TypeScript); core backend and frontend functionality complete, with UI refinements in progress.
- **Vastra Atelier** — Developing a multi-theme (dark/light/ivory) e-commerce UI concept for a luxury saree brand (JavaScript, Node.js); backend architecture complete, frontend in progress.
- **BMSAlerts** — BookMyShow ticket-alert bot built with Node.js and Puppeteer, deployed on Render, with Cloudflare-bypass automation for real-time alerting.

EDUCATION

Bachelor of Engineering — Computer Science and Engineering | GPA: 7.5

Jul 2024

Jyothy Institute of Technology (JIT), Visvesvaraya Technological University (VTU)

CERTIFICATION

MERN Full Stack Development — JSpiders

Jul 2024 – Jan 2025
